Introduction

Facebook Ads is one of the most effective digital advertising platforms that enables businesses to reach their target audience through highly targeted campaigns. With billions of active users across Facebook and Instagram, businesses can promote their products and services, increase website traffic, generate leads, and build brand awareness using Meta Ads Manager.

This project was undertaken as part of my Digital Marketing internship to gain practical experience in planning and configuring a Facebook advertising campaign. A practice campaign was created for an imaginary business named ***Tomar Digital Marketing***, a digital marketing agency offering services such as Search Engine Optimization (SEO), Google Ads, Facebook Ads, Website Development, and Social Media Marketing.

The campaign was designed with the objective of driving traffic to the business website while applying industry-standard practices in audience targeting, budget planning, placement selection, and ad creation. Although the campaign was prepared in a practice environment and was not published due to payment requirements, the complete campaign structure, advertisement, and campaign preview were successfully created using Meta Ads Manager.

This report presents the complete planning, implementation process, campaign configuration, and key learnings gained throughout the project. It demonstrates the practical application of Facebook advertising concepts and provides an overview of the steps followed to create a professional website traffic campaign.

Business Overview

Tomar Digital Marketing is an imaginary digital marketing agency created specifically for this internship project to demonstrate the practical implementation of Facebook advertising concepts. The agency focuses on helping businesses establish a strong online presence and achieve sustainable growth through effective digital marketing strategies.

The primary services offered by Tomar Digital Marketing include Search Engine Optimization (SEO), Google Ads Campaign Management, Facebook Ads, Website Development, Social Media Marketing, and Local Business Promotion. These services are designed to help businesses improve their online visibility, attract potential customers, and increase website traffic through targeted marketing campaigns.

For this project, a professional Facebook Business Page and a practice website were created to simulate a real business environment. A Facebook Traffic Campaign was planned to promote the agency's services and encourage users to visit the website. The campaign was developed using Meta Ads Manager by selecting an appropriate objective, identifying the target audience, setting a suitable budget, designing a professional advertisement, and configuring placements across Facebook and Instagram.

The business was created solely for educational purposes to gain hands-on experience with Facebook advertising tools and campaign management while following industry-standard digital marketing practices.

Business Information

Parameter	Details
Business Name	Tomar Digital Marketing
Industry	Digital Marketing
Business Type	Service-Based Agency
Target Audience	Small Business & Startups
Campaign Objective	Website Traffic
Advertising Platform	Meta Ads Manager

Project Objectives

The primary objectives of this Facebook Ads project are:

- To understand the fundamentals of Facebook advertising using Meta Ads Manager.
- To create and configure a website traffic campaign for an imaginary business.
- To identify and target the appropriate audience based on demographics and interests.
- To design a professional single-image advertisement for promoting digital marketing services.
- To configure campaign settings, budget, schedule, placements, and ad creatives following industry best practices.
- To gain practical experience in managing Facebook advertising campaigns.
- To understand the workflow involved in planning and executing a Meta advertising campaign.
- To enhance practical knowledge of digital marketing and campaign management.

Project Summary

Item	Detail
Project Name	Facebook Ads Practice Campaign
Business	Tomar Digital Marketing
Campaign Objective	Website Traffic
Ad Format	Single Image
Campaign Duration	1 Week
Daily Budget	₹500
Advertising Platform	Meta Ads Manager

Campaign Strategy

To achieve the project objectives, a structured Facebook advertising strategy was developed using Meta Ads Manager. The campaign was designed to drive website traffic and promote the digital marketing services offered by **Tomar Digital Marketing**. The **Traffic** campaign objective was selected to encourage users to visit the business website and explore the services offered.

A **Single Image Advertisement** was chosen because it provides a clear and professional presentation of the business while effectively communicating the key services. The advertisement was designed with a strong headline, concise promotional text, and a clear call-to-action to encourage user engagement.

The campaign targeted users across **India** between the ages of **21 and 45 years**, with interests related to **Digital Marketing, Search Engine Optimization (SEO), Google Ads, Facebook Ads, Small Businesses, and Entrepreneurship**. Manual placements were selected across **Facebook** and **Instagram** to maximize visibility while maintaining control over where the advertisement would appear.

A daily budget of **₹500** was allocated for a campaign duration of **7 days**, making the total planned campaign budget **₹3,500**. This strategy was designed to demonstrate the practical implementation of Facebook advertising concepts while following industry-standard campaign planning practices.

Campaign Setup

The Facebook advertising campaign was created using **Meta Ads Manager** by selecting the Traffic objective and configuring the campaign according to the project requirements. Appropriate campaign settings, audience targeting, budget allocation, placements, and advertisement details were configured to create a professional website traffic campaign for **Tomar Digital Marketing**.

Campaign Configuration

Campaign Setting	Configuration
Campaign Name	Tomar Digital Marketing Website Traffic Campaign
Campaign Objective	Traffic
Buying Type	Auction
Campaign Setup	Manual
Campaign Budget Type	Ad Set Budget
Daily Budget	₹500
Campaign Duration	03 August 2026 – 10 August 2026
Conversion Location	Website
Performance Goal	Maximize Landing Page Views
Ad Format	Single Image
Call-to-Action	Learn More
Destination	Website (Tomar Digital Marketing Wix Website)

Target Audience

A successful Facebook advertising campaign depends on reaching the right audience. For this project, the target audience was carefully selected based on demographic characteristics and interests that align with the services offered by **Tomar Digital Marketing**. The campaign was designed to reach individuals and businesses across **India** who are likely to be interested in digital marketing solutions.

The advertisement targeted users between the ages of **21 and 45 years**, including entrepreneurs, small business owners, marketing professionals, and individuals interested in growing their online presence. Both male and female audiences were included to ensure wider reach. Language settings were kept open to allow Meta to deliver the advertisement to users based on their preferred language.

Interest-based targeting was used to improve campaign relevance. Interests such as **Digital Marketing, Search Engine Optimization (SEO), Google Ads, Facebook Ads, Small Business, and Entrepreneurship** were selected because they closely match the services promoted by the business. Manual placements were configured to display the advertisement on **Facebook and Instagram**, helping maintain greater control over where the advertisement would appear.

The selected audience strategy was intended to maximize the likelihood of reaching users who may require digital marketing services while demonstrating the practical application of audience targeting within Meta Ads Manager.

Budget & Schedule

A suitable budget and campaign duration were planned to demonstrate how advertising costs are managed within Meta Ads Manager. For this project, a **daily budget of ₹500** was selected, which is a commonly used budgeting method for website traffic campaigns. This approach allows advertisers to control daily spending while enabling Meta to optimize ad delivery throughout the campaign.

The campaign was scheduled to run for **seven days**, from **3 August 2026 to 10 August 2026**, resulting in a planned total budget of **₹3,500**. Although the campaign remained in draft mode for educational purposes, the budget and schedule were configured as they would be for a real-world advertising campaign.

A **Traffic** objective was selected with the goal of directing users to the Tomar Digital Marketing website. The **"Learn More"** call-to-action was used to encourage users to visit the website and explore the services offered. This budgeting strategy was chosen to provide a balanced demonstration of campaign planning while remaining suitable for a small business advertising scenario.

The selected budget and schedule effectively illustrate the process of planning and managing advertising expenditure in Meta Ads Manager while maintaining consistency with the objectives of the project.

Budget & Schedule Configuration in Meta Ads Manager

Ad Creative

The advertisement was designed to promote the services offered by **Tomar Digital Marketing** in a professional and visually appealing manner. A **Single Image Advertisement** was selected because it is simple, effective, and suitable for driving website traffic. The creative was developed using a modern blue and white color scheme to reflect professionalism and establish a strong brand identity.

The advertisement highlights the core services offered by the agency, including **Search Engine Optimization (SEO), Google Ads, Facebook Ads, Website Development, and Social Media Marketing**. A clear headline and concise promotional message were included to capture the audience's attention and encourage them to learn more about the services. The **"Learn More"** call-to-action button was selected to direct users to the business website for additional information.

The advertisement was optimized for both **square (1:1)** and **vertical (9:16)** formats, ensuring proper display across Facebook Feed, Instagram Feed, Stories, and Reels. This approach improves the overall viewing experience across different placements while maintaining a consistent brand message.

The final creative effectively communicates the business offerings and supports the campaign objective of increasing website traffic through a professional digital advertisement.

Campaign Preview

After completing the campaign configuration, the advertisement was reviewed using the preview feature available in **Meta Ads Manager**. The preview allowed the advertisement to be displayed across different placements, ensuring that the creative, text, and call-to-action appeared correctly on each platform.

The advertisement was successfully previewed on **Facebook Feed**, **Instagram Feed**, **Facebook Stories**, **Instagram Stories**, and **Facebook Marketplace**. Reviewing the advertisement across multiple placements helped verify that the selected media formats were displayed correctly and that the campaign maintained a consistent appearance across different devices and screen sizes.

The preview also confirmed that the advertisement effectively presented the business information, promotional message, and website destination while maintaining a professional visual layout. This step is an important part of campaign creation because it allows advertisers to identify and correct any design or formatting issues before publishing the campaign.

Although the campaign remained in **Draft** mode due to the payment method requirement, the preview demonstrated that the advertisement was fully configured and ready for publication.

Campaign Preview in Meta Ads Manager

Challenges Faced

During the development of this project, I encountered several practical challenges while learning and working with **Meta Ads Manager**. As this was my first experience creating a Facebook advertising campaign, understanding the campaign structure, audience targeting, budget configuration, and placement options required careful learning and experimentation.

Another challenge was designing advertisement creatives that would display properly across different placements. Separate image formats were prepared to ensure the advertisement appeared correctly in both **Feed** and **Stories/Reels** placements without affecting the visual quality.

While configuring the campaign, Meta required a valid payment method before allowing the advertisement to be published. Since this project was created solely for educational and internship purposes, the campaign was kept in **Draft** mode. However, all campaign settings, advertisements, audience configurations, and previews were completed successfully.

These challenges provided valuable practical experience and improved my understanding of Facebook advertising, campaign planning, and the overall workflow of Meta Ads Manager.

Learning Outcomes

This project provided valuable practical exposure to Facebook advertising using **Meta Ads Manager**. Throughout the campaign creation process, I developed a better understanding of how digital advertising campaigns are planned, configured, and managed. Working on this project allowed me to apply theoretical concepts in a practical environment and gain hands-on experience with Meta's advertising platform.

During the project, I learned how to select appropriate campaign objectives, define target audiences based on demographics and interests, configure campaign budgets and schedules, and choose suitable advertisement placements. I also gained experience in creating professional advertisement creatives, writing effective ad copy, and reviewing advertisements across multiple placements before publication.

In addition to technical knowledge, this project improved my planning, problem-solving, and decision-making skills. Understanding the complete workflow of campaign creation has increased my confidence in using Meta Ads Manager and strengthened my practical knowledge of digital marketing. The experience gained through this project will be valuable for future academic projects as well as professional opportunities in digital marketing.

Conclusion

This project successfully demonstrated the process of planning and configuring a **Facebook Ads Traffic Campaign** using **Meta Ads Manager**. From creating an imaginary business and designing advertisement creatives to selecting the target audience, budget, placements, and campaign settings, every stage of the campaign was completed using industry-standard practices.

Although the campaign was not published due to the payment method requirement, the complete campaign structure, advertisement, and preview were successfully prepared in a practice environment. The project provided practical exposure to Meta Ads Manager and strengthened my understanding of Facebook advertising, campaign planning, audience targeting, and digital marketing strategies.

Overall, this project enhanced both my technical knowledge and practical skills in digital marketing. The experience gained during this internship has increased my confidence in creating and managing digital advertising campaigns and will serve as a valuable foundation for future academic projects and professional opportunities in the field of digital marketing.
